

SEED & SUPPLIES FOR NORTHERN CALIFORNIA

TURFGRASS MIXES: SPECIALTY MIXTURES

PACIFIC SHADE

6 lbs. per 1,000 sq. ft or 250 lbs/acre

30% Pangea GLR Perennial Ryegrass

25% Celestial Creeping Red Fescue

25% Intrigue Chewing Fescue

20% Cypress Poa Trivialis

A mixture of a special shade tolerant bluegrass with shade-tolerant fine fescues and a top-rated perennial ryegrass. Produces a medium green turf where most grasses become too thin because of shade. Especially useful in shady, moist conditions but does well under normal moisture conditions. Use in lawns, parks, cemeteries where shade is the limiting factor.
